Subject: Review of the Phase I Report on the RI/FS for the  
Collierville Site, Collierville, Tennessee

From: Glenn Adams, Toxicologist  
Ground-Water Technology Unit

*Glenn Adams*

To: Beth Brown, Remedial Project Manager  
North Superfund Branch

Thru: Rutherford B. Hayes, Chief  
Ground-Water Technology Unit

*R. B. Hayes*

I have reviewed the Phase I report on the RI/FS for the Collierville site in Tennessee. This report does not have any sections which relate to the public health or environmental concerns which are present at the site. This is a very important part of the RI/FS. If this portion is to be addressed in a later portion of the study, that fact should be noted in this Phase I report.

The report mentions that city of Collierville's west well field has been taken out of production because of the trichloroethylene contamination. This report should also address the presence of private wells in the vicinity of the site. If there are private wells in the vicinity of the site, these wells should be sampled to determine the water quality.

If you have any questions or if I can be of further service, please call me at x3866.
